

SAVE MONEY NOW

Now you can learn about the business of orthopaedics AND earn CMEs at the same time. Register for the AAOE Annual Conference and in just one weekend in Orlando, physicians can earn up to 8.5 CMEs. Stay for the entire conference to earn up to 13 CMEs.

During the physician weekend, attend CME-approved sessions like:

- New Service Lines, Ancillaries, and Major Initiatives
- Are you Delegating or Abdicating?
- Disrupting the Orthopaedic Healthcare Delivery Model
- Lessons in Physician Leadership
- Improving Quality of Care Through Data
- Clinical Integration Success
- Strategies for Hospital Relationships
- Compliance in a Connected World
- Strategic Planning Model
- Innovative Strategies to Bundled Payment Success
- Stump the Lawyer

If you aren't 100% satisfied with the Physician Weekend of CMEs, you can get your money back.

SAVE MONEY FOR YEARS TO COME

Simplify decision-making based on data. Compare outcomes and satisfaction on a national level by collecting your patient satisfaction survey data, patient-reported outcomes, and quality measures in the new AAOE Data Warehouse.

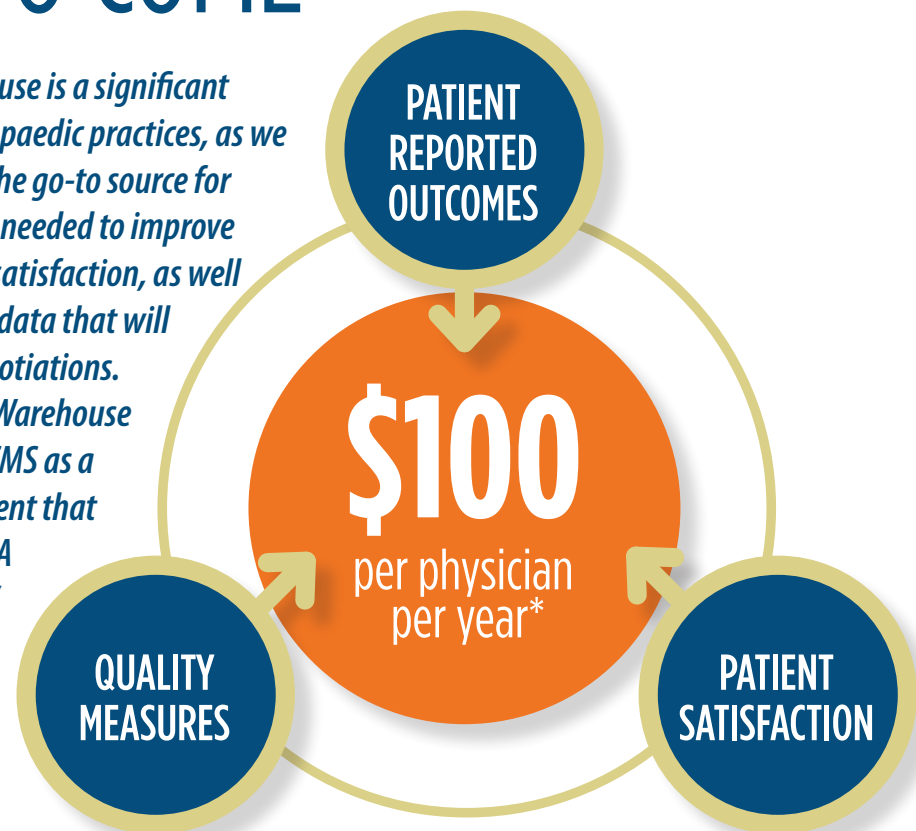

Through April 17, members can sign up for the Data Warehouse for just \$100 per provider for the first year of participation.

Don't miss this one-stop-shop for data collection. The AAOE Data Warehouse will be integrated within the online portal that houses the results of the annual AAOE Benchmarking Survey. Members can access detailed trend analyses of revenue, expenses, productivity, and compensation by subscribing to the online data portal.

Add on a subscription to the benchmarking results for just \$395 for the entire practice. Participate in the survey for data year 2017 for free access to the results.

"The AAOE Data Warehouse is a significant advancement for orthopaedic practices, as we believe it will become the go-to source for actionable data that is needed to improve patient outcomes and satisfaction, as well as the quality and cost data that will be used in contract negotiations. The fact that the Data Warehouse was also approved by CMS as a QCDR makes me confident that we will meet the MACRA requirements in 2018."

Thomas (Quin) Throckmorton, MD
Residency Program Director,
University of Tennessee,
Campbell Clinic, Department
of Orthopaedic Surgery
