National Leadership & Education Conference
Accelerating Health Equity Through Diversity & Inclusion

Dr. Ninfa M. Saunders, FACHE
President and Chief Executive Officer
Navicent Health
Key Findings

• Disparities in quality and outcomes by income and race and ethnicity are large and persistent and have not improved substantially.

• Some disparities related to hospice care and chronic disease management have grown larger.

• Data and measures need to improve to provide a more complete assessment in the areas of care coordination, care affordability and disparities among smaller groups, such as Native Hawaiians, people of multiple races and the LGBT community.

Maternal-Mortality Rate, per 100,000 Live Births
